

CUSTOM DEVICE RACKING FOR PERSONAL SHOPPING SOLUTIONS

As part of an OPI solution, we can create a custom built rack to hold and charge your store's devices.

*Racks can be
free-standing
or wall
mounted*

ACCESSORIES AND INTEGRATION

Your Custom Device Racking can include a variety of accessories and integrations, such as bag racks, hand sanitizer dispenser caddy, video monitors, and interactive kiosk devices. OPI custom kiosk solutions can also be integrated into the PSS device display.

*Optional
high-stability
base extension.*

CUSTOM COLORS AND BRANDING

OPI Custom Device Racking can be customized to any color you wish, and include custom branding in the forms of decals, signage and videos.

ADAPTABLE AND EXPANDABLE

As your PSS solution becomes adopted by more of your customers, you may find a need for more devices. With OPI Custom Device Racking this is not a problem, as existing racks can be expanded to fit more devices, and additional racks can always be seamlessly integrated into your display.

CHARGE AND STORE

Your custom racks are comprised of device holster sets that not only safely hold the devices when not in use, but keep their batteries fully charged, so your stores' devices are as available as possible for your customers to use.
